

TVI-7700 LIQUID LEVEL SWITCH

The TVI-7700 is a side-mounted level switch designed for mounting inside or outside the wall of tanks and other vessels.

The TVI-7700 switch is made of Polybutylene Terephthalate (PBT) with 22 gauge Teflon 24" (609.mm) wire.

The TVI-7700 can be used for small diameter fuel, diesel, gasoline, hydraulic oil and lubricating oil applications etc...

Specification

Max. Temperature :	150°C
Max. PSIG :	100
Float SG :	0.75
Watt Rating :	30
Material :	Polybutylene Terephthalate
Wire :	22 ga. Teflon (24")
